## TOUCH FREE HAND SANITIZER STANDS AND PILLARS

Stern's touch free hand sanitizer dispenser stands and pillars are stand-alone, deck mounted units that are recommended for placement in supermarkets, banks, lobbies and any high traffic public areas. The touch free dispensers are available in several models from either standard full brass chrome plated or premium Stainless Steel AISI316 material. All versions are powered by 9V battery or 12V transformer with a 1 liter bottle or 6 liter tank for high demand locations – depending on the model. Every unit incorporates a peristaltic pump that is compatible with Ethanol, IPA Isopropyl Alcohol - Up to 80% and Alcolgel and all models are suitable for use for use with any brand of hand sanitizer at the correct viscosity of up to 3800 cPs. All stands and pillars are made from high quality Plywood HPL (High Pressure Laminate) with side, front or back door openings. Customization and branding of the front panel is also an option and depending on the model is available in several colors.

## HOW TO SELECT THE RIGHT HAND SANITIZER STAND FOR YOU

### CHOOSE YOUR SANITIZER DISPENSER

#### Csaba Hand Sanitizer

The Csaba Hand Sanitizer has a chrome plated brass body and is activated by a concealed IR sensor that is built into the spout.

#### Classic Hand Sanitizer

The Classic Hand Sanitizer is a robust one piece construction and is activated by IR sensor built into the spout.

#### Elite Hand Sanitizer

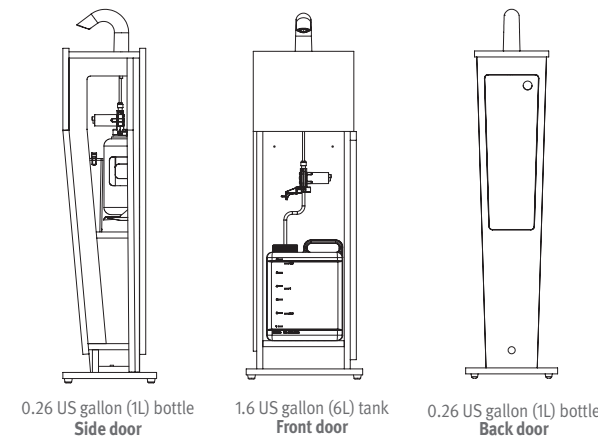

The stylish Elite Hand Sanitizer body is made from antibacterial, anti-corrosion and durable Stainless Steel AISI 316 material. This premium option had been designed for extra hygiene and protection in high risk areas and is supplied with a remote control.

### CHOOSE THE CONTAINER SIZE AND DOOR OPENING OPTION

Depending on the amount of traffic you can choose between a 0.26 US gallon (1L) bottle with a side opening stand door and internal shelf and a 1.6 US gallon (6L) tank with front opening stand.

Upon special request, this 6 gallon tank unit can be supplied with a lockable door. The pillar version of the product is available with a 0.26 US gallon (1L) bottle with a back opening door and internal shelf.

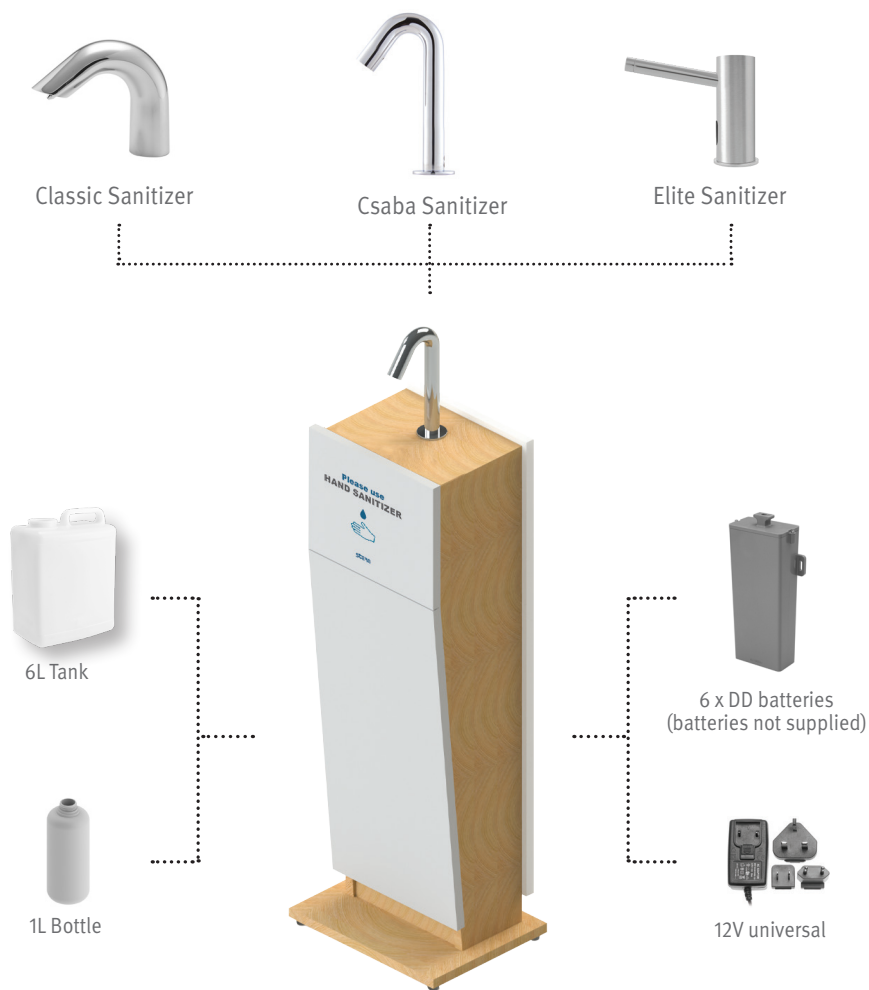

### CHOOSE THE POWER SOURCE

Stern's Touch Free Hand Sanitizer Stands and Pillars have versions for battery and transformer. The battery versions include a waterproof battery box for 6 x DD batteries (batteries not supplied) and the electricity version includes a 12V universal transformer with options for plugs for US/UK/ EU/AU plugs. There is also the option to request both power sources in one product.

# TOUCH FREE SANITIZER STAND FUN

## TOUCH FREE HAND SANITIZER STANDS FOR DAY CARE AND KINDERGARTEN

We have always given a great deal of attention to creativity, independent thinking and physical and emotional safety when setting up an Early Childhood classroom. COVID-19 will change the way we view hygiene forever in schools and kindergartens. While furniture in the preschool classroom should support children's independence in meeting their routine, now more than ever, we must consider their hygiene needs when conducting play and learning activities.

Stern FUN brings all the technology of our Touch Free Hand Sanitizers Stands to transform the classroom into a hygienic and safe zone for kids. Activated by IR sensor, Stern FUN is shorter than our original stands, dispensing sanitizer gel directly into the child's hand without the need for touch. Stern FUN is delivered in a choice of primary colors with soft, rounded edges specifically designed for pre-school ages. A lockable cabinet prevents tampering by those little hands and a set of lockable wheels makes easy movement possible for the teacher when necessary. In addition an off-off mechanism ensures that Stern FUN will not be used unsupervised.

The touch free dispensers are available in several models and all versions are powered by 9V battery or 12V transformer. Every unit incorporates a peristaltic pump that is compatible with Ethanol, IPA Isopropyl Alcohol - Up to 80% and Alcolgel and all models are suitable for use with any brand of hand sanitizer at the correct viscosity of up to 3800 cPs. All Stern FUN units are made from high quality Plywood HPL (High Pressure Laminate) with front opening or 6 liter tank for low maintenance.

**Csaba Fun** has a chrome plated brass body with soft edges and is activated by a concealed IR sensor that is built into the spout.

**Classic Fun** is a robust one piece construction and is activated by IR sensor built into the spout

Both models incorporate a lockable cabinet to prevent tampering and an off-off mechanism to ensure no unsupervised use.

Ref Number: 281200
